

## Location Services on an Android

Location Services is designed to protect your information and enable you to choose what you share.

If your current location is information that you do not want an app to be tracking or sharing, then turn off Location Services on your device.

To do so, the steps are shown below (For an Android.)

- 1

Open the 'Settings' app.
- 2

Select 'Apps.'
- 3

Select 'Permissions;'

4

A list of applications that you have downloaded will appear. Click on the application that you would like to shut Location Services off for. After selecting the application, select 'Never.'
